HOW TO PLAY:

- In each round, a player will automatically be chosen as a Judge.
- In a counter-clockwise order, each player will lay down two OP ('overpowered') cards to create an amazing scenario for the Judge.
- You will then be able to sabotage other players' scenarios, in hopes that the Judge will pick your scenario.

The game is in early stages but it is fully functional. However, there is still a lot of work to do to make it look like a solid finalized game and you may encounter bugs. If this happens, you can take a screenshot and describe the bug and I will gladly investigate it.

Ideally, there will be lobbies and private codes that you can send to your friends but I just wanted to get something up and running initially and worry about after I have all the initial logic setup.

Thanks and I hope you enjoyed the game!
